And how did they get hold of the guns? I don't like it, Steve. I don't like it at all There's a very funny smell to the whole business." "Who was that?" Jean gasped, her eyes wide with disbelief. In its natural condition a society was like an iceberg, eight-ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a fight and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much-- of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. "It would get you out and give you a break." "It could still detach, even without Stern". Jay was evidently developing a feel for Chironian directness. "Coffee?" Geneva inquired. Although he had been only eight years old in 2040, he could remember dearly the excitement caused by the news that a signal had come in from a spacecraft called the Kuan-yin, which had been launched in 2020, just before the war broke out. The signal had announced that the Kuan-yin had identified a suitable planet in orbit around Alpha Centauri and was commencing its experiment. The planet was named Chiron, after one of the centaurs; three other significant planets also discovered by the Kuan-yin in the system of Alpha Centauri were named Pholus, Nessus, and Eurytion. "I knew they were faithless, shiftless," Geneva continued. Cynicism soon turned to rebellion as more of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards. all, including grotesque appendages and strange nodules on the brain? so she would just have to remain.
